

# Transmitter 8ch Elmes Elektronik (CH8NT)

## Device description

PY515 is a remote control with eight keys. The keyboard is made of extruded foil and when pressing the buttons you can feel the key stroke.

The transmitter is powered by a standard 3V battery (CR2450). Transmitter 8ch can work with any Elmes Elektronik receiver except RP501.

The transmission is coded and is based on a variable code, which ensures high security when using wireless systems. Each transmitter has an individual code, and the receiver only reacts to signals that are received from the pilots entered into its memory. PY515 can be assigned to an unlimited number of receivers.

The gray silicone case available separately (PY518).

## Technical data

type	PY515
number of keys	8
frequency	433.92MHz
coding	variable code (KeeLoq® Microchip Inc.)
range	200m – in open area
cooperation	Elmes Elektronik receivers (except RP501)
power supply	CR2450 3V battery (included)
weight	0.05kg
dimensions	width: 45mm height: 90mm depth: 12mm
